

Foundations for Phonics: Tuning into sounds

Progression and planning overview

Teach phonemic awareness and oral blending every day to build children's focused listening and attention. These games will help children to grow these skills in a fun and age-appropriate way. We have curated a limited number of games that we know are the most effective and give children the widest experiences. In this way, children don't waste time learning lots of different activities; instead, they can focus on what they are learning.

- Plan to do the activities on the carpet or outside.
- The activities should be carried out in short, engaging sessions with small groups of children. Consider using all of your staff to run these groups at the same time.
- Choose one phonemic awareness focus and one oral blending focus each day.
- Timetable these sessions so all children get this provision every day.
- You will find detailed guidance for all the games and activities in the Foundations for phonics Prompt cards.
